LIGHTWEIGHT PRESTIGE

The MM712 is the next evolution of our first popular lightweight mouse, leveled up to lightweight prestige. It retains all the same benefits: gaming-grade sensor, hybrid 2.4GHz and Bluetooth 5.1 wireless capability, PTFE feet for unrivaled glide, optical micro switches for near-instant input, and Ultraweave Cable for minimal snagging. However, it does all this while shedding the shredded chassis, opting instead for a seamless, hole-less profile specially engineered to remain <58g in total weight. Responsive, agile, and tactile, the MM712 truly fills in the gaps of its perforated predecessors.

FEATURES

- **Hybrid Wireless Tech** - Choose from wired mode, 2.4GHz wireless, or Bluetooth 5.1 to connect multiple devices
- **Seamless Lightweight Design** - Honeycomb shell housing has been upgraded to a seamless chassis with ambidextrous shape that still keeps the total weight at 59g
- **Gaming-Grade Hardware** - Pro-grade sensor adjustable up to 19,000 DPI, and optical micro switches rated for 70 million clicks and near-instantaneous input time
- **Ultraweave Cable** - Super lightweight and engineered in-house to prevent cable snag when swiping and unnecessary cable drag when in battle
- **Pure PTFE Mouse Feet for Superior Glide** - New-and-improved feet made with PTFE material for low friction and high durability provides a smooth, fast glide without cable pull.
- **Customizable Features** - New, improved software allows you to remap controls, customize your RGBs, tune your macros, and more.
- **RGB Illumination** - Give your victories some flashy good looks with RGB lighting
