1. Do not burn or bury batteries.
2. Do not puncture or crush.
3. Do not disassemble.
4. Li-ion batteries must be recycled. Do not dispose of in the trash.
5. Only use rated charger for Li-ion cells. Be sure the charger's voltage and current settings are correct for the device being charged.
6. Charge batteries on a fireproof surface and away from flammable items or liquids.
7. Batteries should NEVER be left unattended while charging.
8. Keep out reach of children when the product is being charged.
9. Follow the manufacturer's instructions for charging the product.

The specification may change at any time without advance notice. Maxell reserve the rights for any modification of this product.

CE Hereby, Maxell Asia, Ltd. declares that the radio equipment type MXH-HS03 is in compliance with Directive 2014/53/EU.
The full text of the EU declaration of conformity is available at the following Internet address:
www.maxell.eu

Please disposal of waste batteries and electrical and electronic equipment (applicable in the European Union and other European countries with electronic collection systems)

With this symbol on the product, battery or packaging, the product and battery shall not be disposed as household waste.
This symbol may be used in combination with a chemical symbol Hg (mercury), Cd (Cadmium) and Pb (Lead) if the battery contains more than 0.0005% mercury, more than 0.002% cadmium or more than 0.004% lead.

At end-of-life it should be dropped off at the collection point for the recycling of electrical and electronic equipment.

The proper disposal of the product and battery would help preventing potentially negative impact to environment and human health.

For more information about the collection points and recycling of product and battery, please contact your local authorities.
