MASTERBOX MB311L

MCB-B311L-KGNN-S00

GEAR UP, COOL OFF

FEATURES

Fine Mesh Front Panel – Mesh ventilation and upgrade capabilities ensure the latest performance gaming systems can be efficiently cooled.

Mesh Intakes – Large, mesh intakes span each side of the front panel to provide additional airflow to system.

Optimized Airflow – Airflow is optimized by a collaboration between the Fine Mesh front panel, additional mesh intakes, top panel ventilation, and rear exhaust

Tempered Glass Side Panel – Hardware, custom-loop cooling, and the pure pride of the builder is shown in panoramic view through an edge-to-edge tempered glass side panel.

Adaptable Drive Cage – The drive cage is (re)movable, able to shift toward the front to accommodate for PSU space, backwards to provide additional radiator space, or even completely removed.

Versatile Cooling Options – Support for a total of six 120mm fans and front, top and rear radiator placement ensures that you don't have to compromise on performance.

Room For Upgrades – Support for up to a 344mm graphics card, a 166mm CPU cooler, and up to a 325mm PSU in length provides room for upgrades to stay ahead of the game.

For Power-Hungry mATX Builds

The MasterBox MB311L is a Micro-ATX airflow PC case made to be built with the latest gaming hardware and ready for future upgrades. The front panel's façade is made entirely of Fine Mesh, placed between two honeycomb vents on either side to maximize airflow. Since running the latest games, smoothly, means keeping the latest hardware efficiently cooled, top panel ventilation offers the option to add even more cooling hardware—if nothing is mounted, the top panel acts as passive ventilation.

The internal layout was engineered for a high compatibility for the latest gaming hardware while also accounting for future upgrades. Following in the principles of the award-winning MB Series, versatility is paired with presentation to ensure that any gaming system built inside the MasterBox MB311L looks as good as it performs.
