❶ Server grade design
Copper bars joint mainboard and daughter board to increase conversion efficiency.

❷ Special heat sink design for 12V switching circuit
A new heat dissipation design that conducts heat through a thermal pad on the bottom of the power supply, transforming the whole PSU chassis into a heat sink and cooled system airflow.

❸ 3.3V & 5V DC-DC module design
Not only maximize total 12V rating but also minimize the voltage regulation for all rails.

❹ Off-Wet technology
The conformal coating which protects the power supply and its internal components from dust, humidity, stains and harsh environments, the Hydro PTM PRO series are tested to work perfectly even in 95% relative humidity.

❺ Eco semi-fanless function
When Eco switch is on, the fan will not operate until the loading is over 30%.

❻ 5V Standby circuit
It provides stable 3A output to enable high conversion efficiency.

❼ Reliable quality you can trust
Selected 450V, 105℃ electrolytic capacitor provides superior reliability under intense current operation environment.

Intelligent fan speed circuit control design with 0dBA function

Full modular design with ribbon cables
Neat build and easy installation to enhance cooling performance.

User friendly connector allocation
To connect MB with 20+4 pin & PCI-e pin easily, no cable mess in case.

Conformal coating from the inside out
Hydro PTM PRO is covered with conformal coatings to guarantee reliable performance in a harsh environment.
