## **T-11 TELEVEN - simple and elegant**

The T-11 TELEVEN convinces with the front panel with mesh grid insert, behind which up to three 120mm fans can be mounted, which can contribute to a proper air circulation. Another five fan bays can be found in the top, on the back and above the power supply tunnel, in which the power supply and two screwless 3.5" bays are located.

The standard built-in acrylic side panel skilfully stages the installed hardware and is also slightly tinted. There is a magnetic dust filter in the top, which can be easily removed to clean. In addition to the openings for easy cable laying, the T-11 TELEVEN offers installation options for 120mm or 240mm AiO water cooling, which can be mounted in the top, in the front or above the power supply tunnel.

- ✓ Front panel with mesh grid insert
- ✓ Side part made of acrylic glass
