Torrent

All airflow, no compromise.

The Torrent is built to maximize cooling potential straight out of the box. Main standouts include a brand-new component layout, the open front grille and five included fans – two of which are our 180 x 38 mm Dynamic PWM or Prisma RGB fans custom-made to achieve maximum air cooling while maintaining controlled noise levels. Enabling excellent cooling performance (with or without water-loops), the Torrent is a perfect fit for high-end users who want a case that can keep up with an ever-expanding market of hardware upgrades.

Fractal

Key features

- Open grille and 180 mm front fans optimized for maximum air intake

- Newly developed 180 x 38 mm Dynamic X2 PWM or Prisma AL PWM ARGB fans (in the RGB version) leverage power, size, and thickness for massive air-moving capacity

- Includes five PWM fans (three 140 mm and two 180 mm) for balancing performance, cooling and noise

- New layout with expansive base intakes and extra-large bottom fan support offers exceptional GPU cooling

- Optional front and bottom nylon filters included, allowing the user to prioritize between dust filtering or even higher airflow

- Streamlined open interior provides plenty of breathing room for components and maximizes performance potential for both air and water cooling

- Comes with the new Nexus 9P Slim PWM fan hub pre-installed

- Fans and LED lights fully controllable through motherboards supporting addressable RGB (3-pin 5V header) (RGB version only)

- GPU support bracket that helps your GPU stay level (user assembled, instructions included)

- Comes with external cable straps for tidying up behind your computer

- Seamless tempered glass panels with bolt-free top-latching mechanisms for easy handling

- Top mounted aerodynamic PSU shroud with integrated ARGB effects (RGB version only)

- Front fan brackets allow for unblocked airflow to the larger fans while catering to standard radiator sizes

- Removable top bezel and cable guides with cable straps make for easy installation and cable management

- Two sturdy steel drive trays with vibration-damping rubber grommets cushion 3.5" hard drives for smooth, quiet and reliable operation

- Four dedicated SSD brackets included

- Dual recessed channels in the base for adding LED strips and under-lighting effects (both available separately)

- Both front and bottom panel can support extra-thick radiators and push-pull fan configurations up to 420 mm

- Integrated support for a water-cooling reservoir on the motherboard tray

- Seven bridgeless expansion slots allow for extensive customization
