

Uputstvo za upotrebu (EN)

SENCOR grejalica SFH 7020WH

The SENCOR logo is displayed in a bold, red, sans-serif font. The letters are thick and closely spaced, with a modern, industrial feel. The 'S' and 'C' are particularly prominent due to their size and shape.

Tehnoteka je online destinacija za upoređivanje cena i karakteristika bele tehnike, potrošačke elektronike i IT uređaja kod trgovinskih lanaca i internet prodavnica u Srbiji. Naša stranica vam omogućava da istražite najnovije informacije, detaljne karakteristike i konkurentne cene proizvoda.

HOT AIR FAN HEATER

Translation of the original manual

This product is only suitable for well-insulated areas or occasional use! This product is not suitable as a main heat source for the purpose of heating. Information regarding electric local space heaters as required by EU Commission Regulation 2015/1188 is provided in the Annex to this manual.

SENCOR®

SFH 7020WH
SFH 7021BK

A

EN Hot Air Fan Heater

Important Safety Instructions

READ CAREFULLY AND STORE FOR FUTURE USE.

- This appliance may be used by children 8 years of age and older and by persons with physical, sensory or mental impairments or by inexperienced persons, if they are properly supervised or have been informed about how to use of the product in a safe manner and understand the potential dangers.
- Children must not play with the appliance. Cleaning and maintenance performed by the user must not be performed by unsupervised children.
- If the power cord is damaged, it must be replaced by the manufacturer, their service technician or by a similarly qualified person to prevent the occurrence of a dangerous situation.
- Children younger than 3 years of age should be prevented from accessing the appliance unless they are under constant supervision.
- Children between the ages of 3 and 8 may only turn this appliance on/off if it has been placed or installed in its intended normal operating position and if they are supervised or have been instructed in the safe use of the appliance and understand the potential hazards. Children between the ages of 3 and 8 must not insert the plug into

the socket, regulate or clean the appliance or carry out maintenance by the user.

CAUTION:

Certain parts of this product may become very hot and cause burns. Special attention should be paid when children and handicapped people are present.

WARNING:

Do not cover. To prevent overheating, do not cover the heater.

- The heater must not be located just below the power socket.
- Do not use this heater with a program, timer, remote control system or any other component that switches the heater on automatically as there is a risk of fire if the heater is covered or improperly positioned.
- Do not use the appliance in the near vicinity of a bath, shower or swimming pool.
- Do not use the appliance if it has fallen.
- Do not use the appliance if there are visible signs of damage.
- Use the appliance on a stable and horizontal surface only. This heater is not designed to be mounted on a wall.

WARNING:

Do not use the appliance in small rooms if they are occupied by persons who are unable to leave the room on their own, unless permanent supervision is provided.

WARNING:

To reduce the risk of fire, keep textiles, curtains or any other flammable material at a distance of at least 1m from the air outlet.

- Before connecting the appliance to a power socket, check that the nominal voltage on the appliance's rating label matches the electrical voltage in the socket.
- Do not connect the appliance to an extension cord or two way adapter.
- The appliance is designed for use in households, offices and similar types of areas.
- Do not use the appliance in very dusty or humid rooms such as laundries or bathrooms, in areas where chemicals are stored, in industrial surroundings or outdoors.
- Do not use the appliance in the near vicinity of a bath, shower or swimming pool.
- Do not place the appliance on unstable surfaces such as carpets with very long and thick fibres. The appliance must be located on a stable and even surface.
- Free space of at least 100 cm in front of the appliance and 50 cm behind the appliance must be maintained while it is running to ensure sufficient air circulation.
- Never insert any objects through the front grill for the outflow of air or the back grill for the inflow of air. A electrical short circuit could occur, a fire might be started or the appliance may be damaged.
- Do not subject people or animals to the direct flow of hot or cold air for an extended period of time. It may negatively affect their health.
- To avoid potential injury by electric shock do not submerge any part of this appliance in water or any other liquid and do not touch the appliance with damp or wet hands.
- Always turn the appliance off and disconnect it from the power socket if it's to be left unused or before cleaning.
- Do not leave the appliance running while you sleep.
- When cleaning the appliance, do not submerge it in water or wipe it with a wet cloth.
- To avoid damaging the power cord, do not excessively bend or twist it.
- Ensure that the power cord does not come into contact with hot surfaces or sharp objects.
- Do not disconnect the appliance from the power socket by pulling on the power cord. This could damage the power cord or the power socket.
- Disconnect the cord from the power socket by gently pulling the plug of the power cord.
- Do not use the appliance if it is not working correctly, if it has been damaged or has been submerged in water. To avoid the danger of injury by electrical shock, do not repair or modify the appliance yourself. Have all repairs or adjustments of the appliance performed at an authorised service centre. By tampering with the appliance you risk voiding your legal rights arising from unsatisfactory performance or quality warranty. The manufacturer is not responsible for any damages caused by the incorrect use of this appliance.

- Thank you for purchasing a SENCOR brand product and we hope that you will be happy with it.
- Prior to using this appliance, please read the user's manual thoroughly, even in cases, when one has already familiarised themselves with previous use of similar types of appliances. Only use the appliance in the manner described in this user's manual. Keep this user's manual in a safe place where it can be easily retrieved for future use.
- We recommend saving the original cardboard box, packaging material, purchase receipt and responsibility statement of the vendor or warranty card for at least the duration of the legal liability for unsatisfactory performance or quality. In the event of transportation, we recommend that you pack the appliance in the original box from the manufacturer.

DESCRIPTION OF THE APPLIANCE

A1 Power indicator light	These parts are hidden underneath the grill.
A2 Temperature control knob	
A3 Turn switch for starting just the fan, for setting the power level I or II and for turning off the appliance.	A6 Integrated carry handle (not shown) it is located at the rear of the appliance.
A4 Air outlet grill	A7 Air inlet grill (not shown) it is located at the rear of the appliance.
A5 Fan and heating elements	

OPERATING THE APPLIANCE

- Before first use, remove all packaging materials including promotional stickers and labels from the appliance.
- Locate the appliance in a suitable location in accordance with the safety instructions. Make sure that the inflow or outflow vents **A7** or **A4** are not blocked, that the temperature control knob **A2** is set to minimum and the switch **A3** is in position O (off). Connect the appliance to a power socket. After connecting the appliance to a power socket, indicator light **A1** will be lit.

1. SETTING AN OPERATING MODE

- Set the temperature control knob **A2** to maximum and select the desired operating mode using switch **A3**.

Setting switch A3	Description of operating mode
O	Off
	Air ventilation without heating. Only the fan is running. Heating elements are turned off.
I	Power is set to a low level (1 200 W). The fan and one of the two heating elements are running. The heating element heats the air and the fan ensures its flow into the room.
II	Power is set to a high level (2 000 W). The fan and both the heating elements are running. The heating elements heat the air and the fan ensures its flow into the room.

Note:

Upon first use or after it has not been used for an extended period of time, a slight odour may be sensed from the appliance. This is completely normal and will quickly disappear.

2. TEMPERATURE CONTROL KNOB SETTING

- The appliance is equipped with a thermostat that serves to maintain the desired temperature in the room.
- To heat up the air in the room as fast as possible, set switch **A3** to the high power level and the temperature control knob **A2** to maximum. When the desired temperature has been reached, slowly turn the temperature control knob **A2** anticlockwise until you hear a click. The set thermostat will automatically switch the heater and heating elements **A5** on and off to maintain the desired temperature.

3. TURNING OFF

- When you have finished using it, set the temperature control knob **A2** to minimum, set switch **A3** to position O (off) and disconnect the power cord from the power socket. After disconnecting the appliance from the power socket, indicator light **A1** will turn off. Allow the appliance to cool down.

AUTOMATIC SHUT-OFF FUNCTION

- The appliance is equipped with a safety mechanism that automatically turns it off when it is accidentally knocked over. After returning the appliance back to the operating position, it will start running again.

THERMAL PROTECTION

- The appliance is equipped with a thermal fuse that turns it off upon overheating. Should such a situation occur, turn the appliance off and disconnect it from the power socket. Make sure that the air inlet and outlet openings **A7** or **A4** are not blocked. Allow the appliance to cool down before attempting to put it back into operation as this will give the thermal fuse time to reset.
- If you are unable to put the appliance back into operation, contact an authorised service centre.

CLEANING AND MAINTENANCE

- Before cleaning it, make sure that the appliance is turned off and disconnected from the power socket. If the surface of the appliance is hot, allow it to cool down.
- Use a dry or lightly dampened wiping cloth to clean the surface of the appliance. Then thoroughly wipe everything dry. Dust that has settled inside the appliance can be vacuumed out using a vacuum cleaner through the air inlet and outlet grills **A7** and **A4**.
- For cleaning, do not use cleaning products with an abrasive effect, solvents, etc. Otherwise, outer surface of the appliance may be damaged. Do not submerge the appliance or its power cord in water or any other liquids.

TECHNICAL SPECIFICATIONS

Rated voltage range	220–240 V~
Rated frequency.....	50 Hz
Rated power	2 000 W
Power input settings.....	1200 W / 2 000 W
Electrical shock protection class.....	II
Noise level	55 dB(A)

The declared noise emission level is 55 dB(A), which represents a level A of sound power with respect to a reference sound power of 1 pW.

We reserve the right to change text and technical specifications.

Explanation of technical terminology

Safety class for electrical shock protection:
Class II – Electrical shock protection is provided by double or heavy-duty insulation.

Changes to text and technical parameters are reserved.

INSTRUCTIONS AND INFORMATION REGARDING THE DISPOSAL OF USED PACKAGING MATERIALS

Dispose of used packaging material at a site designated for waste in your municipality.

DISPOSAL OF USED ELECTRICAL AND ELECTRONIC EQUIPMENT

This symbol on products or original documents means that used electric or electronic products must not be added to ordinary municipal waste. For proper disposal, renewal and recycling, hand these products over to determined collection points. Alternatively, in some European Union states or other European countries you may return your products to the local retailer when buying an equivalent new product. Correct disposal of this product helps save

valuable natural resources and prevents potential negative effects on the environment and human health, which could result from improper waste disposal. Ask your local authorities or collection facility for more details. In accordance with national regulations penalties may be imposed for the incorrect disposal of this type of waste.

For business entities in European Union states

If you want to dispose of electrical or electronic equipment, ask your retailer or supplier for the necessary information.

Disposal in other countries outside the European Union.

This symbol is valid in the European Union. If you wish to dispose of this product, request the necessary information about the correct disposal method from the local council or from your retailer.

This product meets all the basic requirements of EU directives related to it.
