1 Connect to a Computer

It is recommended to connect your adapter to a USB 3.0 (ss⇄) port.

Option 1: Directly

Option 2: Via the USB Extension Cable (If provided)

2 Install Driver

Follow **Method 1** if the adapter supports Plug and Play feature. If not, please try **Method 2**.

Method 1: Plug and Play

- This adapter supports **Plug and Play** feature. Plug the adapter in and then it is ready to use.

- If your operating system does not support this feature, follow the steps below:
  a. Download the driver or check the new release at www.mercusys.com/support.
  b. Unzip the downloaded folder and run the **Setup.exe** or **SetupInstall.exe**.
  c. Follow the instructions to complete the installation.

Method 2: via Internal Driver Installation

a. Go to **My Computer** or **This PC**.

b. Find out **MERCUSYS** Disk/CD Drive then run the **SetupInstall.exe** to start driver installation.
   Note:
   If you cannot find the setup program, download the driver at www.mercusys.com/support.

c. Follow the instructions to complete the installation.

Tips:
- If you can't install the driver successfully, disable the antivirus software and firewall, then try again.
- If an unknown publisher message pops up, select **Yes** to continue.
- If Windows User Account Control requires admin credentials, type user name and password of your Windows administrator account.

For more driver installation support, refer to **Troubleshooting** > **T2**.

3 Join a Wireless Network

a. Click the network icon on the taskbar (the icon might look like one of these: 🖥, 📶, 📶, or 🌐).

b. Select your Wi-Fi network, click **Connect** and enter the password when prompted.

> 📶 **Home WiFi**
> Secured
>
> Connect
>
> Network settings

Troubleshooting

If you have problems during the installation, please refer to the following online FAQs.
