OVERVIEW

Momentum

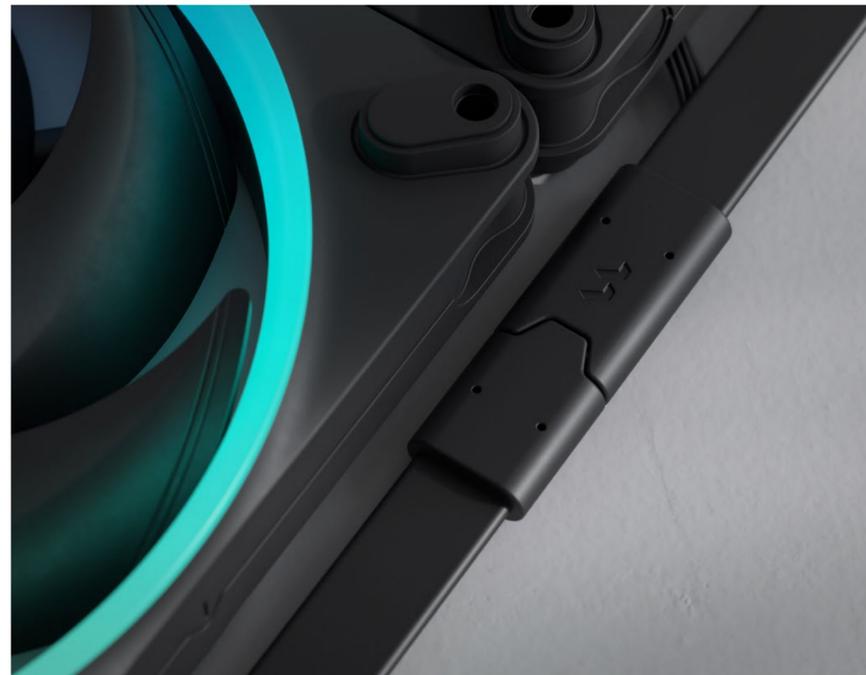

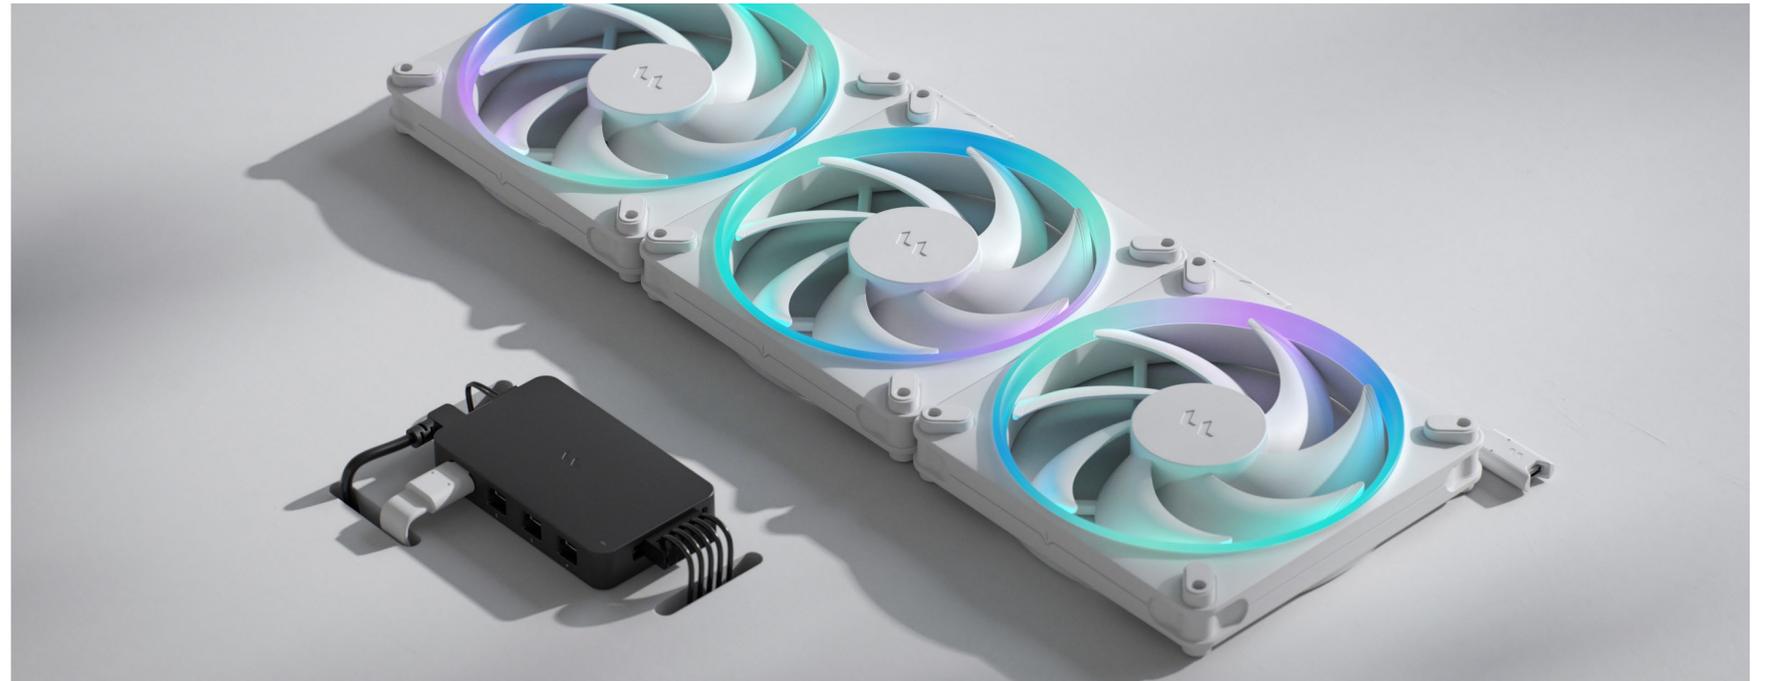

Advanced cooling performance

Momentum is a high-performance fan series that fuses premium materials with performance engineering to minimize noise while maximizing cooling efficiency. It combines a swept blade design, vibration-reducing rubber bushings, and true fluid dynamic bearing technology to ensure quieter operation. To further improve efficiency, Momentum features blades constructed from Liquid Crystal Polymer (LCP), reducing the required distance between the rotor and frame for smooth operation at high rotational speeds.

Key features

- ▶ Crafted with strong Liquid Crystal Polymer (LCP) blades for improved efficiency through precision engineering
- ▶ Incorporates a swept blade design which reduces fan noise, especially at high rotational speeds
- ▶ Features a true Fluid Dynamic Bearing (FDB) with an inner herringbone structure for optimal noise performance and durability
- ▶ Features an illuminated ARGB Gen 2 ring of light, which can be customized to create atmospheric animated effects (RGB version only)
- ▶ Allows a large range of PWM control, including Zero RPM mode, for performance and noise optimization
- ▶ Each fan includes a short integrated flat cable, with one extension cable per cluster for smooth and easy daisy chaining
- ▶ Designed with a clean, unified expression and made with high-quality materials for a sleek, sophisticated finish
- ▶ Includes integrated rubber bushings around screw points to reduce vibration between the fan and case
