### Important safety information

An AC adapter and power cord might be included with the monitor. If you use another cord, use only a power source and connection appropriate for this monitor.

For information about the correct power cord set to use with the monitor, see the *Product Notices* at [HP Regulatory, Safety, Compliance, and Warranty Information](#).

---

 **WARNING!** To reduce the risk of electric shock or damage to the equipment:

- Plug the power cord into an AC outlet that is easily accessible at all times.
- If the power cord has a three-pin attachment plug, plug the cord into a grounded (earthed) three-pin outlet.
- Disconnect power from the monitor by unplugging the power cord from the AC outlet. When unplugging the power cord from the AC outlet, grasp the cord by the plug.

---

For your safety, do not place anything on power cords or cables. Take care to route all cords and cables connected to the monitor so that they cannot be stepped on, pulled, grabbed, or tripped over.

To reduce the risk of serious injury, read the *Safety & Comfort Guide* provided with your user guides. It describes proper workstation setup and proper posture, health, and work habits for computer users. The *Safety & Comfort Guide* also provides important electrical and mechanical safety information. The *Safety & Comfort Guide* is also available on the web at <http://www.hp.com/ergo>.

---

 **IMPORTANT:** For the protection of the monitor and the computer, connect all power cords for the computer and its peripheral devices (such as a monitor, printer, scanner) to a surge protection device such as a power strip or uninterruptible power supply (UPS). Not all power strips provide surge protection; the power strip must be specifically labeled as having this capability. Use a power strip whose manufacturer offers a damage replacement policy so that you can replace the equipment if surge protection fails.

---

Use the appropriate and correctly sized furniture designed to properly support your monitor.

---

 **WARNING!** Monitors that are inappropriately situated on dressers, bookcases, shelves, desks, speakers, chests, or carts could fall over and cause personal injury.

 **WARNING! Stability hazard:** The device might fall, causing serious personal injury or death. To prevent injury, securely attach the monitor to the floor or wall in accordance with the installation instructions.

 **WARNING!** This equipment is not suitable for use in locations where children are likely to be present.

 **NOTE:** This product is suitable for entertainment purposes. Consider placing the monitor in a controlled luminous environment to avoid interference from surrounding light and bright surfaces that might cause disturbing reflections from the screen.

## Locating the serial number and product number

Depending on the product, the serial number and product model number are located on a label on the rear of the monitor or on a label under the front bezel of the monitor head. You might need these numbers when you contact HP for support.

## Postavljanje monitora

U ovom se odjeljku opisuje pričvršćivanje postolja monitora ili kompleta za montiranje monitora na zid te mogućnosti spajanja monitora na računalo, prijenosno računalo, konzolu za igranje ili slične uređaje.

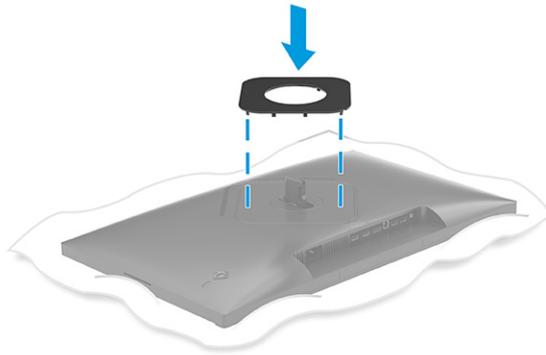

- ⚠ **UPOZORENJE!** Da biste smanjili rizik od ozbiljnih ozljeda, pročitajte *Priručnik za sigurnost i udobnost*. U njemu su opisani pravilno postavljanje radne stanice i pravilno držanje tijela te zdravstvene i radne navike korisnika računala. *Priručnik za sigurnost i udobnost* sadrži i važne informacije o električnoj i mehaničkoj sigurnosti. *Priručnik za sigurnost i udobnost* dostupan je na internetu na adresi <http://www.hp.com/ergo>.
- 📄 **VAŽNO:** Da biste spriječili oštećenje monitora, ne dirajte površinu LCD zaslona. Pritisak na zaslon može uzrokovati neujednačenu boju ili dezorijentaciju tekućih kristala. Ako se to dogodi, zaslon se neće vratiti u uobičajeno stanje.
- 📄 **VAŽNO:** Da biste na zaslonu spriječili ogrebotine, brisanje ili lom te spriječili oštećenje kontrolnih gumba, postavite monitor licem prema dolje na ravnu površinu pokrivenu zaštitnom podlogom ili neabrazivnom tkaninom.

## Attaching the monitor stand

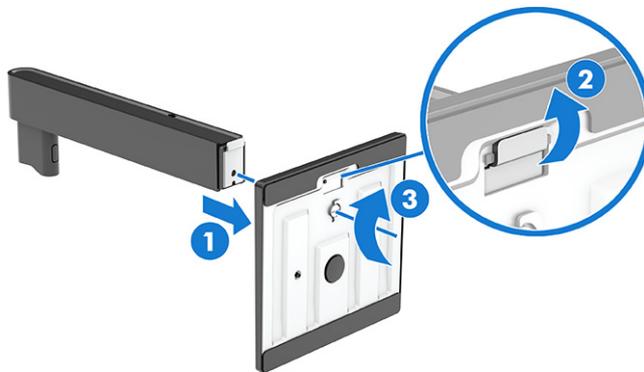

Correctly attaching your monitor stand is critical for safe use. This section describes how to safely attach a stand.

- 💡 **TIP:** Consider the placement of the monitor, because surrounding light and bright surfaces might cause interfering reflections.
- 📄 **NOTE:** The procedures for attaching a monitor stand might be different on other models.

1. Attach the VESA cover.

2. Align the stand with the base (1), secure the latch (2), and tighten the screw (3).

3. Position the monitor head facedown on a flat surface covered by a protective sheet made of foam or a clean, dry cloth.
4. Attach the stand assembly to the back of the monitor.

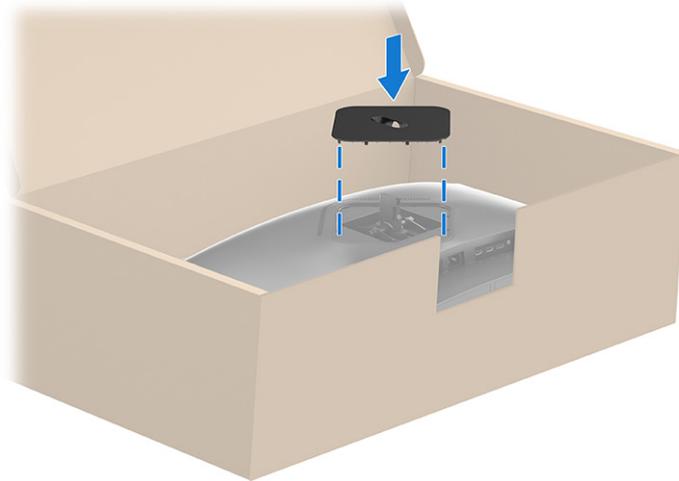

## Attaching the monitor stand (curved models)

Correctly attaching your monitor stand is critical for safe use. This section describes how to safely attach a stand to a curved monitor.

 **TIP:** Consider the placement of the monitor, because surrounding light and bright surfaces might cause interfering reflections.

 **NOTE:** The procedures for attaching a monitor stand might be different on other models.

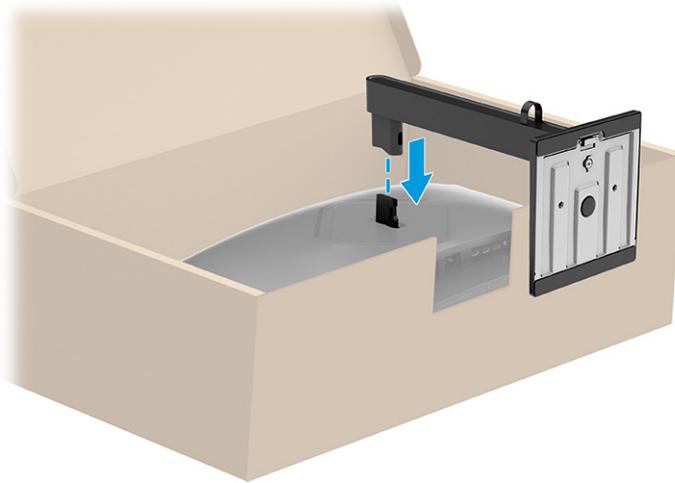

1. Position the monitor head facedown in the original packing box and attach the VESA cover to the back of the monitor.

2. Align the base with the stand (1), secure the latch (2), and tighten the screw (3).

3. Attach the stand to the back of the monitor.

## Montiranje zaslona monitora

Kako biste monitor priključili na zid pomoću okretnog nosača ili nekog drugog nosača, slijedite korake u ovom odjeljku kako biste sigurno i čvrsto povezali monitor.

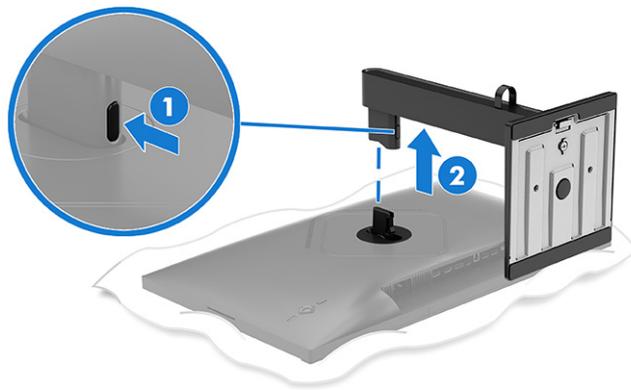

-  **VAŽNO:** Ovaj monitor podržava industrijski standard VESA rupa za montiranje od 100 mm. Za postavljanje zaslona monitora na montažna rješenja neovisnih proizvođača potrebna su četiri vijka od 4 mm, koraka 0,7 i duljine 10 mm. Duži vijci mogu oštetiti monitor. Morate utvrditi da montažno rješenje proizvođača udovoljava zahtjevima standarda VESA te da ima nazivnu nosivost potrebnu da izdrži težinu zaslona monitora. Za najbolje performanse upotrijebite kabele za napajanje i videokabele koje ste dobili s monitorom.
-  **NAPOMENA:** Ovaj sklop je predviđen za postavljanje na zidni nosač za montiranje usklađen s UL ili CSA zahtjevima.

## Removing the monitor stand

If you decide to use a wall mount instead of the monitor stand that you attached, first remove the stand.

-  **IMPORTANT:** Before you disassemble the monitor, be sure that the monitor is turned off, and all cables are disconnected.
-  **IMPORTANT:** To position and stabilize the monitor, HP recommends that two people perform these procedures.
  1. Disconnect and remove all cables from the monitor.
  2. Position the monitor facedown on a flat surface covered by protective sheet made of foam or a clean, dry cloth.
-  **CAUTION:** If you are removing the stand from a curved monitor, position the monitor facedown in the original packing box. Then remove the stand. Positioning a curved monitor facedown on a flat surface might damage the monitor.
- 3. Push up the latch near the bottom center of the stand's mounting plate (1).

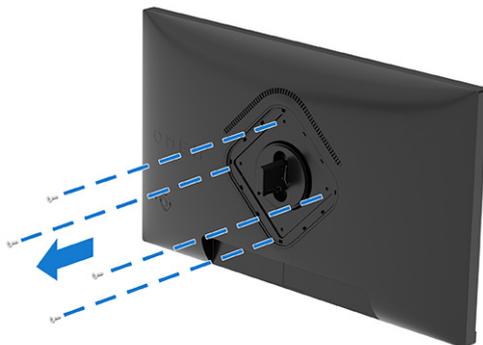

4. Lift the stand and off the monitor head (2).

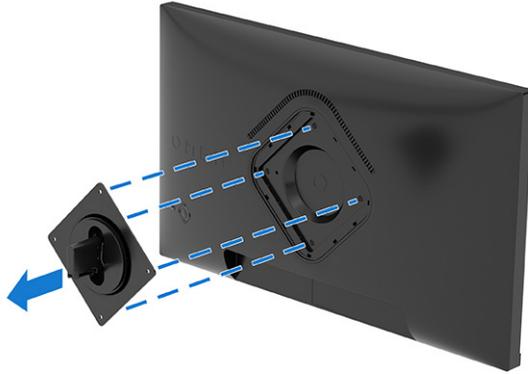

### Attaching the monitor head to a mounting device

You might need additional tools such as a screwdriver (purchased separately) when you attach a mounting device. To avoid damage to your monitor, follow these instructions.

1. Remove the four screws from the VESA holes located on the rear of the monitor head.

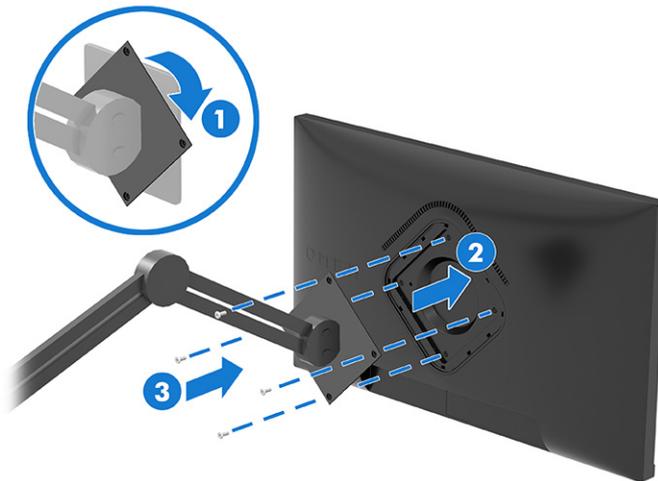

2. Remove the hinge from the VESA recess located on the rear of the monitor head.

3. To attach the monitor head to a swing arm or other mounting device, align the mounting plate on the swing arm with the screw holes on the back of the monitor head (1).

 **IMPORTANT:** If these instructions do not apply to your device, then follow the mounting device manufacturer's instructions when mounting the monitor to a wall or swing arm.

4. Insert four mounting screws through the holes on the mounting device and into the VESA screw holes on the back of the monitor head (2) and secure the screws (3).

## Connecting the cables

In addition to details about how to connect a cable, this section contains information about how your monitor functions when you connect certain cables.

 **NOTE:** The monitor supports HDMI or DisplayPort inputs. The video mode is determined by the video cable used. The monitor automatically determines which inputs have valid video signals. You can select the inputs through the OSD menu. The monitor ships with select cables. Not all cables shown in this section are included with the monitor.

1. Place the monitor in a convenient, well-ventilated location near the computer.

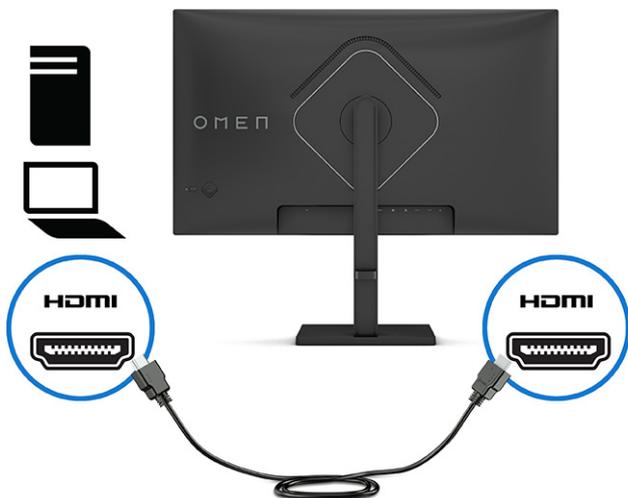

2. Connect a video cable.

 **NOTE:** The monitor automatically determines which inputs have valid video signals. To select any input, open the OSD menu and select **Input**.

- Connect one end of a DisplayPort cable to the DisplayPort connector on the rear of the monitor and the other end to the DisplayPort connector on the source device.

- Connect one end of an HDMI cable to the HDMI port on the rear of the monitor and the other end to the HDMI port on the source device.

3. Connect one end of the power cord to the power connector on the monitor and the other end to an AC outlet.

 **WARNING!** To reduce the risk of electric shock or damage to the equipment:

- Do not disable the power cord grounding plug. The grounding plug is an important safety feature.
- Plug the power cord into a grounded (earthed) AC outlet that is easily accessible at all times.

- Disconnect power from the equipment by unplugging the power cord from the AC outlet.

For your safety, do not place anything on power cords or cables. Arrange them so that no one can accidentally step on or trip over them. Do not pull on a cord or cable. When unplugging the power cord from the AC outlet, grasp the cord by the plug.

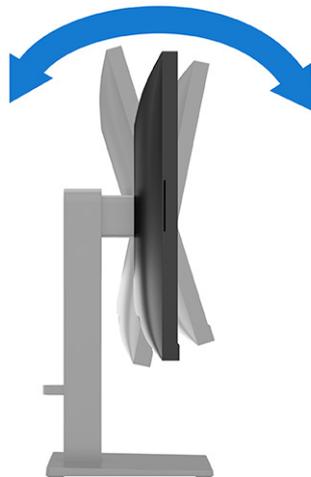

---

## Adjusting the monitor

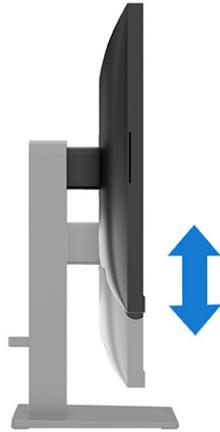

To support an ergonomic work space, your monitor offers the adjustment options outlined in this section.

1. Tilt the monitor head forward or backward to set it to a comfortable eye level.

2. Adjust the monitor's height to a comfortable position for your individual workstation. The monitor's top bezel edge should not exceed a height that is parallel to your eye height. A monitor that is

positioned low and reclined might be more comfortable for users with corrective lenses. Reposition your monitor as you adjust your working posture throughout the work day.

3. Swivel the monitor to the left or right for the best viewing angle.

4. You can pivot the monitor head from landscape to portrait orientation viewing to adapt to your application (not available on curved-screen models).
  - a. Adjust the monitor to full-height position and tilt the monitor back to full tilt position (1).
  - b. Pivot the monitor counterclockwise or clockwise 90° from landscape to portrait orientation (2).

 **IMPORTANT:** If the monitor is not in full height and full tilt position when pivoting, the bottom-right corner of the monitor panel will come in contact with the base and potentially cause damage to the monitor.

If you are adding an optional speaker bar to the monitor, install it after pivoting the monitor. The speaker bar will come in contact with the base when the monitor pivots and potentially cause damage to the monitor or speaker bar.

---

 **NOTE:** Use the operating system's display settings to rotate the image on the screen from portrait to landscape. To rotate the OSD from portrait to landscape, open the OSD menu and select **Menu**, select **Menu Rotation**, and then select **Portrait**.

---

## Turning on the monitor

This section provides important information about preventing damage to your monitor, startup indicators, and troubleshooting information.

---

 **IMPORTANT:** Burn-in image damage might occur on monitors that display the same static image on the screen for 12 or more hours. To avoid burn-in image damage, you should always activate a screen saver application or turn off the monitor when it will not be in use for a prolonged period of time. Image retention is a condition that might occur on all LCD screens. Burn-in damage on the monitor is not covered under the HP warranty.

 **NOTE:** If pressing the power button has no effect, the Power Button Lockout feature might be enabled. To disable this feature, press and hold the monitor power button for 10 seconds.

 **NOTE:** On select HP monitors, you can disable the power light in the OSD menu. Press the center of the OSD controller to open the OSD, select **Power**, select **Power LED**, and then select **Off**.

---

- Press the power button on the monitor to turn it on.

When you first turn on your monitor, a monitor status message is displayed for 5 seconds. The message shows which input is the current active signal, the status of the auto-switch source setting (On or Off; default setting is On), the current preset display resolution, and the recommended preset display resolution.

The monitor automatically scans the signal inputs for an active input and uses that input for the display.

## HP watermark and image retention policy

Some monitors are designed with In-Plane Switching (IPS) and VA display technology, which provides ultrawide viewing angles and advanced image quality. Though suitable for many applications, this panel technology is not suitable for static, stationary, or fixed images for long periods of time, unless you use screen savers.

Applications with static images can include camera surveillance, video games, marketing logos, and templates. Static images can cause image retention damage that could look like stains or watermarks on the monitor's screen.

Image retention damage on monitors that are in use 24 hours per day is not covered under the HP warranty. To avoid image retention damage, always turn off the monitor when it is not in use, or use the power management setting, if supported on your computer, to turn off the monitor when the computer is idle.

---

**Table 3-1 OSD menu options (select products only)**

Main menu	Description
Gaming	Selects and adjusts gaming preferences, such as AMD FreeSync™ or Adaptive-Sync, MPRT, response time, frame rate, crosshair, message timers, and multiple-monitor alignment.
Image	Adjusts the screen image, including brightness, contrast, dynamic contrast, black stretch, sharpness, video level, and image scaling.
Color	Provides a variety of color presets that configure the monitor for different viewing situations.
Input	Selects the video input signal (DisplayPort or HDMI).
Power	Adjusts the power settings.
Menu	Adjusts the OSD menu.
Management	Returns all OSD menu settings to the factory default settings.
Information	Contains information about current mode, optimal mode, color setting, display mode, firmware package version, hardware revision, and serial number.

## Selecting color presets

Use the OSD menu to select from a variety of color presets that configure the monitor for a variety of different viewing situations.

To access the color presets:

1. In the OSD menu, select the **Color** menu.
2. Select a color preset. The following table describes the available color presets.

**NOTE:** Each preset has both a standard dynamic range (SDR) and high dynamic range (HDR) configuration.

**Table 3-2 Color presets and descriptions**

Color preset	Description
Gaming	A high brightness preset that takes advantage of the native, wide gamut of the monitor. In High Dynamic Range (HDR), this preset uses the 2084 PQ + clip response.
- or -	
FPS/RPG/RTS (G2 only)	
Standard	Recommended for general computing use, this preset has an sRGB gamut in SDR and a P3 gamut in HDR. Both modes have a D65 white point.
Warm	This color preset provides a warmer D55 white point for the SDR mode. This white point is close to that used by 35 mm projectors and may be preferred for watching black-and-white films because it more closely matches their original appearance.

**Table 3-2 Color presets and descriptions (continued)**

Color preset	Description
Cool	Identical to the Standard color preset, but provides a cooler, more blue look than the standard white point. This preset uses a D75 white point.
Night	Night mode is a low blue light preset that reduces the amount of blue spectral energy emitted by the monitor. This color preset has a very warm color temperature (2856K).
Native	This is the native color temperature and gamut of the LCD panel (no color processing or tuning is performed).
HP Enhance+	The HP Enhance+ color submenu/preset adds an additional level of detail (sharpness and contrast) to static images and motion video to enhance their appearance. The three user-selectable options are Low, Medium, and High. The default is Medium.
RGB Gain Adjust	Use this setting to adjust the color temperature of any color preset. RGB gain adjustments are stored separately for each color preset.
Cinema	Use this mode for watching movies. It should be set to industry standard values for SDR content.

## Display mode status

When you turn on the monitor, the status message shows the display mode. The display mode is also displayed when you change the video input.

The current display mode shows in the **Information** menu window and at the bottom of the OSD's main menu in the status bar area. Modes of operation vary by model. The most common modes are **Normal**, **AdaptiveSync**, and **AMD FreeSync Premium** or **AMD FreeSync**.

To turn on the AdaptiveSync or AMD FreeSync mode (select model):

1. Press the center of the OSD controller to open the OSD.
2. In the OSD, select **Gaming**.
3. Select **AdaptiveSync** or **AMD FreeSync Premium** or **AMD FreeSync**, and then select **On**.

**NOTE:** The AdaptiveSync menu default setting is on.

## Using Auto-Sleep Mode

Your monitor has an energy-saving feature called Auto-Sleep Mode, which is a reduced power state. This section describes how to activate or adjust Auto-Sleep Mode on your monitor.

When Auto-Sleep Mode is enabled, which it is by default, the monitor enters a reduced power state when the computer signals low-power mode, which it does by the absence of either a horizontal or vertical sync signal.

Upon entering this reduced power state (Auto-Sleep mode), the monitor screen is blanked, the backlight turns off, and the power light turns amber. The monitor draws less than 0.5 W of power when in this reduced power state. The monitor wakes from Auto-Sleep mode when the computer sends an active signal to the monitor, for example, when you activate the mouse or keyboard.

To disable Auto-Sleep Mode in the OSD:

1. Press the **Menu** button to open the OSD, or press the center of the OSD controller to open the OSD.

# 5 Održavanje monitora

Pravilno održavani monitor može ispravno raditi godinama. Ove upute opisuju korake koje možete poduzeti da bi monitor bio u najboljem stanju.

## Upute za održavanje

Za najbolju izvedbu i dugovječnost monitora:

- Ne otvarajte kućište monitora i ne pokušavajte sami servisirati ovaj proizvod. Prilagođavajte samo one kontrole koje su navedene u uputama. Ako monitor ne radi ispravno, pao je ili je oštećen, obratite se ovlaštenom distributeru HP proizvoda, zastupstvu, prodavaču ili davatelju usluga.
- Koristite samo odgovarajući izvor napajanja i veze za ovaj monitor kako je prikazano na naljepnici ili stražnjoj ploči monitora.
- Provjerite da ukupna nazivna jakost u amperima proizvoda priključenih na utičnicu napajanja nije veća od nazivne vrijednosti utičnice izmjenične struje te da ukupna nazivna jakost u amperima proizvoda priključenih na kabel napajanja ne premašuje nazivnu vrijednost kabela napajanja. Potražite na naljepnici napajanja nazivnu jakost u amperima (AMPS ili A) za svaki uređaj.
- Instalirajte monitor uz utičnicu kojoj lako možete pristupiti. Odspojite monitor tako da čvrsto uhvatite za utikač i izvučete ga iz utičnice. Nikada nemojte odspajati monitor povlačenjem za kabel napajanja.
- Isključite monitor kada nije u upotrebi i koristite čuvar zaslona. Time možete značajno produljiti životni vijek monitora.

**NAPOMENA:** Zadržavanje slike na monitoru nije obuhvaćeno HP jamstvom.

- Nikada nemojte blokirati utore i otvore na kućištu ili u njih gurati predmete. Ti otvore služe za ventilaciju.
- Nemojte ispustiti monitor ili ga postaviti na nestabilnu površinu.
- Nemojte dopustiti da ništa leži na kabele za napajanje. Nemojte hodati po kabele.
- Držite monitor u dobro prozračenom području, podalje od jake svjetlosti, vrućine ili vlage.

## Cleaning the monitor

Use these instructions to clean your monitor when necessary.

1. Turn off the monitor and unplug the power cord from the AC outlet.
2. Disconnect any external devices.
3. Dust the monitor by wiping the screen and the cabinet with a soft, clean antistatic cloth.

---

**⚠ CAUTION:** Never spray cleaner directly onto the screen. It can run behind the bezel and damage the electronics. Water dripping into the ventilation openings or other points of entry can cause

damage to the monitor. Protect your monitor by always consulting your user guide for cleaning procedures, or go to <http://www.hp.com/support> and search for How to Clean Your Computer.

 **IMPORTANT:** Do not use cleaners that contain petroleum-based materials such as benzene, thinner, or any volatile substance to clean the monitor screen or cabinet. These chemicals might damage the monitor.

 **IMPORTANT:** Spray the cleaner onto a cloth and use the damp cloth to gently wipe the screen surface. The cloth should be moist, but not wet. Allow the monitor to air-dry before use.

---

4. After you remove the dirt and debris, you can also clean the surfaces with a disinfectant. The World Health Organization (WHO) recommends cleaning surfaces, followed by disinfection, as a best practice for preventing the spread of viral respiratory illnesses and harmful bacteria. A disinfectant that is within HP's cleaning guidelines is an alcohol solution consisting of 70% isopropyl alcohol and 30% water. This solution is also known as rubbing alcohol and is sold in most stores.

## Transport monitora

Sačuvajte izvorno pakiranje u spremištu. Možda ćete ga kasnije trebati za transportiranje ili premještanje monitora.

## Značajka štednje energije

Ovaj monitor podržava stanje reduciranog napajanja.

Stanje reduciranog napajanja se pokreće ako monitor otkrije odsustvo signala vodoravne ili okomite sinkronizacije. Nakon što utvrdi odsustvo ovih signala, zaslon monitora postaje taman, pozadinsko osvjetljenje se isključuje te žaruljica indikatora napajanja svijetli jantarno. U smanjenom stanju napajanja monitor upotrebljava < 0,5 W napajanja. Postoji kratko razdoblje zagrijavanja prije no što se monitor vrati u normalno radno stanje.

Konzultirajte priručnik računala za upute o postavljanju načina uštede energije (ponekad se naziva i značajka upravljanja napajanjem).

**NAPOMENA:** Gore spomenuta značajka štednje energije funkcionira samo kada je monitor povezan na računalo koje posjeduje značajke za uštedu energije.

Odabirom postavki u uslužnom programu monitora Sleep Timer (Mjerač vremena mirovanja), možete i programirati monitor da pokreće stanje reduciranog napajanja u unaprijed određeno vrijeme. Kada uslužni program Sleep Timer (Mjerač vremena mirovanja) na monitoru pokrene stanje reduciranog napajanja, žaruljica napajanja trepće jantarno.

## B Pristupačnost

HP-ov je cilj osmisliti, proizvoditi i prodavati proizvode, servise i informacije koje svi na svim mjestima mogu koristiti, bilo samostalno ili s odgovarajućim uređajima ili aplikacijama drugih proizvođača.

### HP i pristupačnost

S obzirom na to da je HP-ov cilj u temelje svoje tvrtke ugraditi raznolikost, uključivost i ravnotežu poslovnog i privatnog vremena, to se odražava u svemu što HP radi. HP teži stvaranju inkluzivnog okruženja usredotočenog na povezivanje osoba s tehnologijom širom svijeta.

### Pronalaženje potrebnih tehnoloških alata

Tehnologija može osloboditi vaše ljudske potencijale. Pomoćna tehnologija uklanja prepreke i pojednostavnjuje stvaranje neovisnosti kod kuće, na poslu i u zajednici. Pomoćne tehnologije pridonose povećanju, održavanju i poboljšanju funkcionalnih mogućnosti elektroničke i informacijske tehnologije.

Dodatne informacije potražite u odjeljku [Pronalaženje najbolje pomoćne tehnologije na stranici 40](#).

### HP-ova predanost

HP predano pruža proizvode i usluge dostupne osobama s invaliditetom. Ta predanost podržava ciljeve različitosti tvrtke i jamči dostupnost pogodnosti tehnologije svima.

HP-ov je cilj pristupačnosti dizajnirati, proizvoditi i prodavati proizvode i usluge koje mogu učinkovito koristiti svi, uključujući osobe s invaliditetom, samostalno ili uz odgovarajuće pomoćne uređaje.

Da bismo ostvarili taj cilj, Pravilnik o pristupačnosti utvrđuje sedam ključnih ciljeva koji će voditi HP-ove akcije. Od svih HP-ovih voditelja i zaposlenika očekuje se da podržavaju te ciljeve i njihovu implementaciju u skladu sa svojim ulogama i odgovornostima:

- Podignite razinu svijesti o problemima pristupačnosti unutar HP-a, a zaposlenicima pružite obuku potrebnu za dizajniranje, proizvodnju, prodaju i isporuku dostupnih proizvoda i usluga.
- Razvijte smjernice pristupačnosti za proizvode i usluge, a grupe za razvoj proizvoda smatrajte odgovornima za implementiranje tih smjernica kada je to kompetitivno, tehnički i ekonomski moguće.
- U razvoj smjernica pristupačnosti te dizajniranje i testiranje proizvoda i usluga uključite osobe s invaliditetom.
- Dokumentirajte značajke pristupačnosti i objavite informacije o HP-ovim proizvodima i servisima u pristupačnom obliku.
- Uspostavite odnose s vodećim davateljima pomoćnih tehnologija i rješenja.
- Podržite interno i vanjsko istraživanje i razvoj koji poboljšava pomoćnu tehnologiju relevantnu za HP-ove proizvode i servise.
- Pružite podršku industrijskim standardima i smjernicama pristupačnosti te sudjelujte u njima.

## IAAP (International Association of Accessibility Professionals)

IAAP je neprofitna udruga usredotočena na poboljšanje profesije pristupačnosti putem umrežavanja, obrazovanja i certificiranja. Cilj je profesionalcima koji se bave pristupačnošću pomoći pri razvijanju i poboljšanju karijera te tvrtkama ili ustanovama pojednostavniti integriranje pristupačnosti u proizvode i infrastrukturu.

HP se, kao član i osnivač, pridružio da bi zajedno s drugim tvrtkama i ustanovama sudjelovao u poticanju razvoja polja pristupačnosti. Ta predanost podržava cilj pristupačnosti HP-a u vezi s dizajniranjem, proizvodnjom i oglašavanjem proizvoda i usluga koje osobe s invaliditetom mogu učinkovito koristiti.

IAAP će osnažiti našu profesiju globalnim povezivanjem pojedinaca, učenika i organizacija da bi međusobno učili. Ako želite saznati više, posjetite <http://www.accessibilityassociation.org> da biste se pridružili internetskoj zajednici, prijavili se za biltene i doznali pojedinosti o mogućnostima članstva.

## Pronalaženje najbolje pomoćne tehnologije

Svi, uključujući osobe s invaliditetom ili dobnim ograničenjima, trebali bi imati mogućnost komuniciranja, izražavanja i povezivanja sa svijetom pomoću tehnologije. HP predano radi na povećanju razine svijesti o pristupačnosti unutar HP-a te kod klijenata i partnera.

Neovisno o tome radi li se o velikim fontovima koji su ugodniji za oči, o glasovnom prepoznavanju koje vam omogućuje da vam se ruke odmore ili o nekoj drugoj pomoćnoj tehnologiji koja će vam pomoći u određenoj situaciji, raznovrsnost pomoćnih tehnologija pojednostavnjuje korištenje HP-ovih proizvoda. Kako odabrati?

## Procjena vlastitih potreba

Tehnologija može osloboditi vaše potencijale. Pomoćna tehnologija uklanja prepreke i pojednostavnjuje stvaranje neovisnosti kod kuće, na poslu i u zajednici. Pomoćna tehnologija (AT) pridonosi povećanju, održavanju i poboljšanju funkcionalnih mogućnosti elektroničke i informacijske tehnologije.

Možete odabrati neke od mnoštva proizvoda pomoćne tehnologije. Procjena pomoćne tehnologije trebala bi vam omogućiti procjenu nekoliko proizvoda, odgovoriti na pitanja i pomoći pri odabiru najboljeg rješenja za vašu situaciju. Uočit ćete da mnogi profesionalci kvalificirani za procjenu pomoćne tehnologije dolaze s mnogih područja, uključujući osobe licencirane ili certificirane za fizikalnu terapiju, radnu terapiju, patologiju govora/jezika itd. Ostale osobe, iako nisu certificirane ili licencirane, mogu pružiti informacije o procjeni. Da biste utvrdili odgovaraju pojedinci li vašim potrebama, postavite im pitanja o iskustvu, stručnosti i naknadama.

## Standardi i zakonodavstvo

Države diljem svijeta uvode propise za poboljšanje pristupa proizvodima i uslugama za osobe s invaliditetom. Uvriježilo se da se ti propisi odnose na telekomunikacijske proizvode i usluge, računala i pisače s nekim značajkama za komunikaciju i videoreprodukciju, pripadajuću korisničku dokumentaciju i korisničku podršku.

## Standardi

Američki odbor za pristup informacijama osmislio je Dio 508 savezne uredbe o nabavi (FAR-a) koja propisuje standarde za pristup informacijskoj i komunikacijskoj tehnologiji (ICT-u) za osobe s tjelesnim, senzornim i kognitivnim poteškoćama.

Standardi sadrže tehničke kriterije karakteristične za različite vrste tehnologija te preduvjete utemeljene na performansama koji se fokusiraju na funkcionalne mogućnosti obuhvaćenih proizvoda. Posebni kriteriji obuhvaćaju softverske aplikacije i operacijske sustave, web-informacije i aplikacije, računala, telekomunikacijske proizvode, videosadržaje i multimedijske sadržaje te samostalne zatvorene proizvode.

### Zahtjev 376 – EN 301 549

Europska unija je stvorila normu EN 301 549 u okviru zahtjeva za normizaciju 376 kao internetski paket alata za javnu nabavu ICT proizvoda. Norma uređuje preduvjete pristupačnosti primjenjive na ICT proizvode i servise s opisom testnih postupaka i metodologije procjene za svaki preduvjet.

### Smjernice za osiguravanje pristupačnosti mrežnih sadržaja (Web Content Accessibility Guidelines, WCAG)

Smjernice za osiguravanje pristupačnosti mrežnih sadržaja (Web Content Accessibility Guidelines, WCAG) radne skupine Web Accessibility Initiative (WAI) organizacije W3C web-dizajnerima i razvojnim inženjerima pojednostavnjuje stvaranje web-mjesta koja bolje zadovoljavaju potrebe osoba s invaliditetom ili dobnim ograničenjima.

WCAG potiče pristupačnost u velikom broju web-sadržaja (tekst, slike, audio i videosadržaj) i web-aplikacija. WCAG se može precizno testirati, jednostavno ga je shvatiti i koristiti, a web-dizajnerima omogućuje fleksibilnost i inovativnost. WCAG 2.0 odobren je kao [ISO/IEC 40500:2012](#).

WCAG posebno rješava prepreke za pristupanje webu na koje nailaze osobe s vizualnim, slušnim, tjelesnim, kognitivnim i neurološkim oštećenjima te stariji korisnici interneta s potrebama za pristupačnošću. WCAG 2.0 pruža karakteristike pristupačnog sadržaja:

- **pojmljivost** (na primjer, rješavanjem tekstnih alternativa za slike, titlova za zvuk, prilagodljivosti prezentacije i kontrasta boja)
- **operabilnost** (rješavanjem tipkovničkog pristupa, kontrasta boja, vremenom unosa, izbjegavanjem napadaja i mogućnošću navigacije)
- **razumljivost** (rješavanjem čitljivosti, prediktivnosti i pomoći pri unosu)
- **robusnost** (na primjer, rješavanjem kompatibilnosti s pomoćnim tehnologijama)
